

History of Revisions:

Section	Title	Action
2	A Suggested Protocol for Continuous Flow Automated Analysis of Seawater Nutrients	Introduced November 1993
2	Measuring ^{14}C in Seawater SCO_2 by Accelerator Mass Spectrometry	Revised Text January 1992 Revised Figures November 1993
4	CTD Oxygen Calibration Procedure	Revised November 1993
4	Improving NBIS MK IIIB Measurements	Introduced November 1994

Editorial Note:

From time to time, new material will be added or earlier material revised in this *WHP Operations and Methods* manual. Included in this update are three sections. Two are new discussions (*Nutrients* and *Improving NBIS MK IIIB Measurements*) and the other two replace earlier versions.

Complete copies of the *Operations Manual* can be obtained by contacting either the WHPO in Woods Hole or the WHP SAC in Hamburg.
